

Project Overview

This study is evaluating the roughly 2-mile segment of Mn 220 N/DeMers Avenue from 9th Street NE on the Southern end and 140th Street SW on the northern end. The Mn 220 Corridor provides an important connection within the region, connecting downtown, residential, and commercial areas within East Grand Forks. The project team has completed the evaluation of the existing and forecast conditions, documentation of existing safety concerns, mobility issues and have identified transportation needs within the corridor.

This is our first public open house to engage interested citizens of Grand Forks/East Grand Forks. Prior to moving into the identification and evaluation of alternatives, we invite folks to voice concerns, issues and/or provide comment as it relates to the study.

Study Goals

Examine traffic operations at key intersections and develop potential options to improve mobility, access, and safety

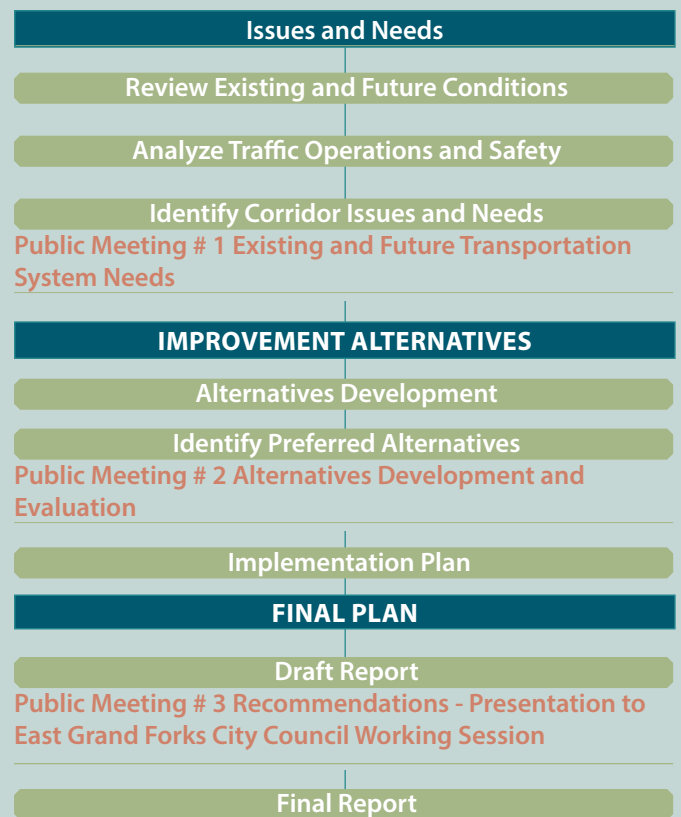

Improve pedestrian crossing opportunities and safety at key locations along the corridor

Develop a document that provides recommendations for future transportation facility needs along Mn220 N and its crossroads

Tentative Milestone Dates

EVENT	SUBJECT	TENTATIVE DATES
Steering Committee Meeting #3	Alternatives Development	February 2019
Steering Committee Meeting #4	Preferred Alternatives	April 2019
Public Meeting #2	Alternatives Evaluation	April 2019
Steering Committee Meeting #5	Implementation Plan	May 2019
Draft Report		May 22, 2019
Public Meeting #3	Recommendations	June 2019
Final Report		June 30 2019
